

Engineering of USTHB, in collaboration with the Scientific and Technical Research Center for the Development of Arabic Language (Centre de recherches Scientifique et Technique du développement de la langue Arabe CRSTDLA) is organizing the 4th Doctoral Days on September 23, 2024.

This day aims to present the research activities developed within the LCPTS-CRSTDLA through oral communications and posters from researchers from the different teams. Plenary conferences are also planned and will be presented by specialists in speech communication, signal processing and Human machine interfaces.

Abderrahmane in gratitude for their academic and scientific contribution, and in homage for their dedication and their commitment to the activities of our laboratory, our faculty and our university.
